Music Intent

Respect – Our tailored termly schemes of work promote respect for different religions and cultures discovering musical influences and preferences from around the world. We perform music enjoyed by young people globally, understanding its importance and significance.

Exceptional – Using our musical programs, we create exceptional performances, transforming our youngsters into musicians and composers with an exciting journey through the technical elements of music such as notation and composition.

Resilience – Every musician/performer must develop resilience and our children are no exception.
They understand the hard work and determination required to create an exciting outcome ready to perform in school, within the local community, trust competitions and even in our local theatre.

High aspirations – At SJA our pupils always rise to the challenge as their aspirations are high! Inspired by the unique musical projects and countless performance opportunities available to them, our budding artists aim high and are excited by the world of music.

Independence – Promoting independence in music is key. Whether it is mastering a musical instrument, singing a scale or delivering a critique on an orchestral arrangement, we encourage pupils to independently progress within this subject area so that they have the skills required in a secondary setting as successful musicians/performers.

Creativity – We strive to empower our young performers/musicians by creating real opportunities for all our children to take part in numerous creative projects throughout their time with us. Concerts, choir tours, competitions, theatre performances, after school clubs and trust wide projects.
